  <FilesMatch (\.js|\.css)$>
    ExpiresActive On
    # According to RFC 2616, "1 year in the future" means "never expire".
    # We change the name of the file's URL whenever its modification date
    # changes, so browsers can cache any individual JS or CSS URL forever.
    # However, since all JS and CSS URLs involve a ? in them (for the changing
    # name) we have to explicitly set an Expires header or browsers won't
    # *ever* cache them.
    ExpiresDefault "now plus 1 years"
    Header append Cache-Control "public"
  </FilesMatch>

  # This lets Bugzilla know that we are properly sending Cache-Control
  # and Expires headers for CSS and JS files.
  SetEnv BZ_CACHE_CONTROL 1
