

```
# The .htaccess file is a configuration file for the Apache web server  
# It allows us to change the web servers settings, apply chaching,  
# specify error files, password protect directories, etc.
```

```
#Setup environment variables for connecting to the database
```

```
SetEnv DB_USER root
```

```
SetEnv DB_PASS
```

```
SetEnv DATA_SOURCE mysql:host=localhost;dbname=wood0022
```
