## OFFLINE SUPPORT ##
```

```
# These rules tell apache to check if there is a cookie called "offline", with value set to the
```

```
# current angular version. If this rule matches the appcache-offline.manifest will be served for
```

```
# requests to appcache.manifest
```

```
#
```

```
# This file must be processed by Rake in order to replace %ANGULAR_VERSION% with the actual version.
```
