

```
# $Id: .htaccess 1821 2008-01-15 09:58:55Z hpd1 $  
#  
# This is used with Apache WebServers  
# The following blocks direct HTTP requests in this directory recursively  
#  
# For this to work, you must include the parameter 'Limit' to the AllowOverride  
configuration  
#  
# Example:  
#  
#<Directory "/usr/local/apache/htdocs">  
# AllowOverride Limit  
#  
# 'All' will also work. (This configuration is in your apache/conf/httpd.conf file)  
#  
# This does not affect PHP include/require functions  
#  
# Example: http://server/catalog/admin/backups/backup.sql will not work
```
