

```
RewriteEngine On
```

```
RewriteBase /
```

```
#### Use this when everything is running normal
```

```
RewriteCond %{REQUEST_FILENAME} !-f
```

```
RewriteRule .? /index.php [L]
```

```
#### You are using PHP as CGI? Use this method
```

```
# RewriteCond %{REQUEST_FILENAME} !-f
```

```
# RewriteRule .? /index.php [E=HTTP_AUTHORIZATION:%{HTTP:Authorization},L]
```

```
#### Still not working? Change server or use this evil hack
```

```
# RewriteCond %{HTTP:Authorization} !^$
```

```
# RewriteRule .? /index.php?HTTP_AUTHORIZATION=%{HTTP:Authorization} [QSA,L]
```

```
# RewriteRule .? /index.php [L]
```
