

## RewriteEngine On

```
# Some hosts may require you to use the `RewriteBase` directive.  
# If you need to use the `RewriteBase` directive, it should be the  
# absolute physical path to the directory that contains this htaccess file.  
#  
# The RewriteBase needs to get the relative path to the folder  
# in this example it gets the path after http://bera.mobi as /tinydb/matt
```

```
RewriteBase /tinydb/matt/
```

```
RewriteCond %{REQUEST_FILENAME} !-f
```

```
RewriteRule ^ index.php [QSA,L]
```

```
#DirectoryIndex index.php
```
