RewriteRule ^ index.php [L,QSA]
```

```
# Modify the RewriteBase if you are using Trotch in a subdirectory or in a
```

```
# VirtualDocumentRoot and the rewrite rules are not working properly.
```

```
# For example if your site is at http://domain.com/"my/trotch uncomment and
```

```
# modify the following line:
```

```
#
```

```
# RewriteBase /"my/trotch
```
