```
<IfModule mod_rewrite.c>
RewriteEngine on
# Please note that RewriteBase setting is obsolete use it only in case you experience some
# problems with SEO addon.
# Some hostings require RewriteBase to be uncommented
# Example:
# Your store url is http://www.yourcompany.com/store/cart
# So "RewriteBase" should be:
# RewriteBase /store/cart
# RewriteBase /
RewriteCond %{REQUEST_FILENAME} !\. (png|gif|ico|swf|jpe?g|js|css)$
RewriteCond %{REQUEST_FILENAME} !-f
RewriteCond %{REQUEST_FILENAME} !-d
RewriteRule . index.php?sef_rewrite=1 [L,QSA]

</IfModule>
