

```
# In order to enforce HTTP access (vs HTTPS access) the following
# directives should be added to the main Apache configuration file
#
# <VirtualHost *:80>
#     RewriteEngine on
#     RewriteCond %{REQUEST_URI} !^/ontology
#     RewriteRule (.*) https://premon.fbk.eu$1 [R=301,L]
# </VirtualHost>
#
# <VirtualHost *:443>
#     RewriteEngine on
#     RewriteCond %{REQUEST_URI} ^/ontology
#     RewriteRule (.*) http://premon.fbk.eu$1 [R=301,L]
# </VirtualHost>
```
