

```
# The following directives force the content-type application/octet-stream  
# and force browsers to display a download dialog for non-image files.  
# This prevents the execution of script files in the context of the website:
```

```
ForceType application/octet-stream  
Header set Content-Disposition attachment  
<FilesMatch "(?i)\.(gif|jpe?g|png|pdf|doc|docx)$">  
    ForceType none  
    Header unset Content-Disposition  
</FilesMatch>
```

```
# The following directive prevents browsers from MIME-sniffing the content-type.  
# This is an important complement to the ForceType directive above:
```

```
Header set X-Content-Type-Options nosniff
```

```
# Uncomment the following lines to prevent unauthorized download of files:
```

```
#AuthName "Authorization required"
```

```
#AuthType Basic
```

```
#require valid-user
```
