# Enable mod_rewrite in Apache and uncomment the following
# settings to use nice urls.
#
# If you are using Apache Alias, then provide with RewriteBase
# the path to anomey. e.g. if the url to the index.php
# is http://example.org/cms/anomey/index.php then set this:
#
# RewriteBase /cms/anomey
#
# For more information visit:
# http://httpd.apache.org/docs/2.0/mod/mod_rewrite.html#rewritebase
####################################################################

#RewriteEngine on
#RewriteCond %{SCRIPT_FILENAME} !-f
#RewriteRule ^(.*)$ rewrite.php/$1

DirectoryIndex index.php
```
