

Turn off all options we don't need.

Options None

Options +FollowSymLinks

Deny from all

Set the catch-all handler to prevent scripts from being executed.

SetHandler Drupal_Security_Do_Not_Remove_See_SA_2006_006

<Files *>

Override the handler again if we're run later in the evaluation list.

SetHandler Drupal_Security_Do_Not_Remove_See_SA_2013_003

</Files>

If we know how to do it safely, disable the PHP engine entirely.

<IfModule mod_php5.c>

php_flag engine off
