# READ THIS COMPLETELY IF YOU CHOOSE TO USE THIS FILE

#

# The line just below this section: 'Options +FollowSymLinks' may cause problems

# with some server configurations. It is required for use of mod\_rewrite, but may already

# be set by your server administrator in a way that disallows changing it in

# your .htaccess file. If using it causes your server to error out, comment it out (add #

to

# beginning of line), reload your site in your browser and test your sef url's. If they

work,

# it has been set by your server administrator and you do not need it set here.

#

#####

## Can be commented out if causes errors, see notes above.
