```

*### Additional Settings that may need to be enabled for some servers
Uncomment the commands by removing the # sign in front of it.
If you get an "Internal Server Error 500" after enabling any of the following
settings, restore the # as this means your host doesn't allow that.*

*# 1. If your cart only allows you to add one item at a time, it is possible
register_globals is on. This may work to disable it:
php_flag register_globals off*

*# 2. If your cart has magic quotes enabled, This may work to disable it:
php_flag magic_quotes_gpc Off*

*# 3. Set max upload file size. Most hosts will limit this and not allow it to be
overridden but you can try
php_value upload_max_filesize 999M*

*# 4. set max post size. uncomment this line if you have a lot of product options or are
getting errors where forms are not saving all fields
php_value post_max_size 999M*

*# 5. set max time script can take. uncomment this line if you have a lot of product
options or are getting errors where forms are not saving all fields
php_value max_execution_time 200*

*# 6. set max time for input to be recieved. Uncomment this line if you have a lot of
product options or are getting errors where forms are not saving all fields
php_value max_input_time 200*

*# 7. disable open_basedir limitations
php_admin_value open_basedir none*
