```
## The following directives should enhance security in the media
## directory.  However they are reported to make some trouble with
## Apache2 and/or when PHP is used as CGI.
## They are not really needed anymore as the upload mechanism
## now is controlled through $conf['uploadtypes'] - but you may want
## to try if they work for you.  Some more security is always nice :-)

# php_value engine off
# AddType text/plain .php .phtml .php3 .html .htm .shtml
```
