*### Additional Settings that may need to be enabled for some servers*

*### Uncomment the commands by removing the # sign in front of it.*

*### If you get an "Internal Server Error 500" after enabling any of the following*

### If you get an internal server error 500 after enabling any of the following settings, restore the # as this means your host doesn't allow that.

# 1. If your cart only allows you to add one item at a time, it is possible register\_globals is on. This may work to disable it:

```
# php_flag register_globals off
```

# 2. If your cart has magic quotes enabled, This may work to disable it:

```
# php_flag magic_quotes_gpc Off
```

# 3. Set max upload file size. Most hosts will limit this and not allow it to be overridden but you can try

```
# php_value upload_max_filesize 999M
```

# 4. set max post size. uncomment this line if you have a lot of product options or are getting errors where forms are not saving all fields

```
# php_value post_max_size 999M
```

# 5. set max time script can take. uncomment this line if you have a lot of product options or are getting errors where forms are not saving all fields

```
# php_value max_execution_time 200
```

# 6. set max time for input to be recieved. Uncomment this line if you have a lot of product options or are getting errors where forms are not saving all fields

```
# php_value max_input_time 200
```

# 7. disable open\_basedir limitations

```
# php_admin_value open_basedir none
```
