

```
# $Id: .htaccess,v 1.1.1.1 2004/03/04 23:40:35 ccwjr Exp $
#
# This is used with Apache WebServers
# The following blocks direct HTTP requests in this directory recursively
#
# For this to work, you must include the parameter 'Limit' to the AllowOverride
configuration
#
# Example:
#
#<Directory "/usr/local/apache/htdocs">
#  AllowOverride Limit
#
# 'All' will also work. (This configuration is in your apache/conf/httpd.conf file)
#
# This does not affect PHP include/require functions
#
# Example: http://server/catalog/includes/application_top.php will not work

# There is no files in this folder to be accessed directly from the browser
<Files *. *>
  order allow,deny
  deny from all
</Files>
```
