

```

# In case you want to add a .htpasswd authentication
# you'll have to add the host of the shop as an allowed entity,
# so that calls from the host skip the authentication
# Example:
# Order Deny, Allow
# Deny from All
# AuthType Basic
# AuthName "Access not allowed"
# AuthUserFile path_to_htpasswd_file/.htpasswd
# Require valid-user
# Allow from localhost
# Satisfy Any
