

ErrorDocument 403 "By default, Mutillidae only allows access from localhost (127.*.*.*).
Edit the .htaccess file to change this behavior (not recommended on a public network)."

Order Deny,Allow

Deny from all

This allows access from localhost

Allow from 127.

Allow from localhost

This is to allow access from other machines on Virtual Box host-only networks.

Allow from 192.168.0.0/16

The following section disables PHP magic quoting feature.

Turning these on will cause issues with Mutillidae.

*## Note: Turning these on should NEVER be relied on as a method for securing against
injection attempts.*

As of PHP 5 these options will be removed for exactly that reason.
