### Additional Settings that may need to be enabled for some servers
```

```
### Uncomment the commands by removing the # sign in front of it.
```

```
### If you get an "Internal Server Error 500" after enabling any of the following  
settings, restore the # as this means your host doesn't allow that.
```

```
# 1. If your cart only allows you to add one item at a time, it is possible  
register_globals is on. This may work to disable it:
```

```
# unset(register_globals)
```

```
# php_flag register_globals off
```

2. If your cart has magic quotes enabled, This may work to disable it:

```
# php_flag magic_quotes_gpc Off
```

3. Set max upload file size. Most hosts will limit this and not allow it to be overridden but you can try

```
# php_value upload_max_filesize 999M
```

4. set max post size. uncomment this line if you have a lot of product options or are getting errors where forms are not saving all fields

```
# php_value post_max_size 999M
```

5. set max time script can take. uncomment this line if you have a lot of product options or are getting errors where forms are not saving all fields

```
# php_value max_execution_time 200
```

6. set max time for input to be recieved. Uncomment this line if you have a lot of product options or are getting errors where forms are not saving all fields

```
# php_value max_input_time 200
```

7. disable open_basedir limitations

```
# php_admin_value open_basedir none
```
