

Use PHP for all these filetypes

AddType application/x-httpd-php .php .xml

Use this page as the 404 document

ErrorDocument 404 index.php

Disallow Directory Listings

DirectoryIndex index.php

Turn on mod_rewrite to capture the shortname from a url and pass it on as a url parameter

RewriteEngine On

Only use 1 of the following RewriteBase options ~ comment the other out

for when Sahana is installed on a virtual host at root level ie. http://domain.com/

#RewriteBase /

for when Sahana is installed in a user homedir ie.

http://domain.gov/~gmiernicki/sahanaDev/www/

RewriteBase /sahana-dmu/www/

make mod_rewrite skip the subsequent rules if the file or folder exists already (the number must be incremented each time a new rule is added below)

RewriteCond %{REQUEST_FILENAME} -d [OR]

RewriteCond %{REQUEST_FILENAME} -f

RewriteRule .* - [S=42]

matches /person.XXXXXX for the person uuid's as urls

RewriteRule ^(person.[0-9]+)\$?mod=eap&val=\$1 [L]

handle resource pages

RewriteRule ^(about)\$?mod=rez&page=-30 [L]

RewriteRule ^(privacy)\$?mod=rez&page=44 [L]

handle actions

RewriteRule ^(login)\$?mod=pref&act=loginForm [L]

RewriteRule ^(auth)\$?doLogin=1 [L]

RewriteRule ^(password)\$?mod=pref&act=ch_passwd [L]

RewriteRule ^(logout)\$?act=logout [L]

RewriteRule ^(register)\$?mod=pref&act=signup [L]

RewriteRule ^(\$|reset-password)\$?mod=pref&act=reset_passwd [L]

```
RewriteRule ^(/register/)$ ?mod=pref&act=signupz [L]
