

Turn on URL rewriting only when mod rewrite is turn on

```
<IfModule mod_rewrite.c>  
RewriteEngine on  
RewriteCond %{REQUEST_FILENAME} !-d  
RewriteCond %{REQUEST_FILENAME}\.php -f  
RewriteRule ^([^\/]+)/$ $1.php
```

Forces a trailing slash to be added

```
RewriteCond %{REQUEST_FILENAME} !-f  
RewriteCond %{REQUEST_FILENAME} !-d  
RewriteCond %{REQUEST_URI} !(\. [a-zA-Z0-9]{1,5}| /)$  
RewriteRule (.*)$ /$1/ [R=301,L]  
</IfModule>
```

Protect the htaccess from being viewed

```
<Files .htaccess>  
    order allow,deny  
    deny from all  
</Files>
```

Don't show directory listings for URLs which map to a directory.

```
Options -Indexes
```

#Follow symlinks

```
Options +FollowSymlinks
```
