

```
# This file contains information to force the browser to cache certain
# information such as stagnant data, shaders, and javascript files.
#
# This file causes unnecessary queries to the server to be minimized (instead
# of the client waiting "300ms per file [interleaved] for just a HTTP 304
# response, the browser will just load the file from its cache).
#
# A forced-reload of the page (ctrl-F5) will cause the browser to forgo its
# cache and grab resources from the webserver anew.
