RewriteEngine On

If your SumoStore installation does not run on the main web folder make sure you alter RewriteBase accordingly

I.E. If you run in /shop/, alter to RewriteBase /shop/

Do not forget to remove the #, otherwise it won't work

#RewriteBase /

RewriteRule ^error/not_found.html\$ index.php?route=error/not_found [L]

### Additional Settings that may need to be enabled for some servers  
### Uncomment the commands by removing the # sign in front of it.  
### If you get an "Internal Server Error 500" or a white page after  
### enabling any of the following settings, restore the # as this means  
### your host doesn't allow that.
```

```
# php_flag register_globals off  
# php_flag magic_quotes_gpc Off  
# php_value upload_max_filesize 999M  
# php_value post_max_size 999M  
# php_value max_execution_time 200  
# php_value max_input_time 200  
# php_admin_value open_basedir none
```

```
### Getting a white page? Uncomment these settings to display all errors
```

```
php_flag display_errors on  
php_flag display_startup_errors on  
php_value error_reporting 8191
```
