    # /abc/def/.htaccess -- per-dir config file for directory /abc/def
```

```
    #
```

```
    # Remember: /abc/def is the physical path of /xyz, i. e., the server
```

```
    #         has a 'Alias /xyz /abc/def' directive e. g.
```

```
    #
```

```
    # let the server know that we were reached via /xyz and not
```

```
    # via the physical path prefix /abc/def
```

```
    # in this case we should use :
```

```
    # RewriteBase /xyz
```

```
    #
```

```
    # If you are accessing Arta via alias and not via physical root then
```

```
    # you can uncomment following line and add your alias instead of /arta
```

```
    # to make rewriting work fine.
```

```
    #RewriteBase /arta
```

```
